

- This task starts on Thursday 50-01-01 which is after its 'Start No Later Than' constraint.
- Resources over allocated due to work on other tasks

- Chris Gray

This change has caused the task 16 and 18 to conflict by overlapping the end date of task 16 and the start date of task 18. The change eliminated the task constraint dates with less than the required allocation of units according to their links with other task.

In fact, this change affected many other tasks but only Chris Gray came up with an actual error message. There are several others which are over allocated.
